Description

The construction and function of this wall light are highly poetic, evoking the well-known game of noughts and crosses. It is possible to create one's own personal decorative arrangement, in which one can vary the light intensity by selecting the number of crosses to be illuminated. The basic set comprises 5 crosses made from matt black injected polycarbonate which are backlit by LEDs and clipped into a double L-shaped matt black lacquered steel wall frame. Each set may be used on its own, or may be combined with others (up to 6 in total). Dimensions of a single cross: H 9 W 9 D 2.5 cm. Each additional set may be connected to any of those crosses already installed. The possibilities for creating installations are thus limitless. Each cross turns 45°: turn to the left to switch off the current, or to the right to let it continue. In this way a multitude of light trails may be created. Each set of 5 crosses is equipped with LEDs totalling 10W, giving off a total of 780 lumens (the equivalent of a 65W incandescent bulb). Colour temperature: 3,000 K (warm white). 2.5 m black cable. The first cross serves as a general on-off switch. THIS LIGHT CONTAINS INTEGRAL LED LIGHTS OF ENERGY CLASS A.
