# For a French, sustainable, and innovative design

Today, the 5th generation of the Roset family is at the helm of the company. An unprecedented context and, with it, the opportunity to draw up a lasting vision, addressing all the challenges that lie ahead.

The digitalization of our production and sales methods will be valuable tools for meeting the major challenges ahead, including that of our sustainable development.

The facts are known to everyone.

Together, we must reduce our greenhouse gas emissions by at least 5% per year until 2050.

This vision and objective are challenges for the company.

We will need time, the right approach, and education to achieve it, whilst developing both our industrial facilities and our 100% French expertise.

These efforts should allow us to innovate, create and share with all our stakeholders. From the designer to the supplier, via our employees and consumers, everywhere in the world. Just enough time to leave the keys for the 6th generation of the family.

Antoine & Olivier Roset,  
Directors of the Roset Group

# A family history since 1860

## 2<sup>nd</sup> generation

### Émile Roset

1920 : Trends change, women abandon the parasol.  
Emile Roset decides to convert his wood lathes to  
make chair bases.  
1936 : Production of the first leather upholstered  
seats.

## 4<sup>th</sup> generation

### Michel & Pierre Roset

1975 : Founding of the CINNA brand.  
1975 > 1982 : Creation of 5 foreign subsidiaries .  
1986 : Enlargement of the home furnishings  
collection : Decorative items, lighting, rugs.  
1990 : The company now has 750 employees.  
1995 > 2006 : Expansion and construction work  
around Briord.  
2009 : First Group carbon footprint report.

## 1<sup>st</sup> generation

### Antoine Roset

1860 : Founding of the umbrella canes factory.  
1893 > 1913 : Antoine Roset's widow takes over the  
management of the family business.

## 3<sup>rd</sup> generation

### Jean Roset

1950 : Creation of the first contract collections.  
1965 : The Roset company switches its focus to  
contemporary design.  
1970 : International expansion and the first  
designer collaborations.  
1973 : Official founding of the Ligne Roset brand  
and opening of the first store. Establishment of the  
company headquarters in Briord (Ain).

## 5<sup>th</sup> generation

### Antoine & Olivier Roset

2021 : The family brand became famous : with  
over 750 designers at its side, the brand shows  
important growth. A change of direction in  
response to new production challenges: more than  
750 outlets and over 700 employees.  
2022 : New challenges arise around the  
democratization and renewal of design, making  
stronger commitments toward preserving the  
environment, and going digital : important  
commitments for the years to come.

" The remarkable site in which the Roset company has evolved since its inception reminds us daily of our duties of eco-citizens. We owe it our upmost respect. "

Pierre Roset

Factories and head office at Briord (Ain)

# French furniture manufacturer

A family requirement:  
keeping the production in the heart of Bugey (Ain)

The head office has been located in Briord (Ain) since 1973. Since then, the site has evolved considerably but the Roset family has always wished to keep the company's headquarters here, out of loyalty to their family history and to those who participated in the evolution of the company and the region.

Our seats and other pieces of furniture are now produced in the 155,000m<sup>2</sup> of industrial space represented by our 5 factories located in Ain, Rhône and Isère. We are proud of the fact that our products are Made in France.

In the factory, our production methods make it possible to reduce the quantities of raw materials used, optimising processes in order to increase yield and limit scraps and waste. We use our wood shavings and dust to fuel a wood-fired boiler which completely heats our 45,000m<sup>2</sup> St-Jean-le-Vieux production site. The fumes from this burner are filtered using

an electro filter to be well below emission limit values. Everything is overseen by the DREAL (Direction Régionale de l'Environnement, de l'Aménagement et du Logement or Regional Department for the Environment, Living and Housing).

2022 has seen us achieve recognition by becoming a member of "La French Fab". The Roset Group supports French Industry and the "French touch" with the aim of accelerating its transformation and sustainable development. We collaborate with other players in the industry to ensure its prosperous future by making the professions that compose it attractive. The Roset Group is like those who have helped make its name for the past 160 years: "briolands", inhabitants of the town of Briord, in Ain. The brand was born there and has settled there, just as we settle in our seats: comfortably and durably.

# Preserve French craftsmanship

Ligne Roset has been labeled EPV since 2022, for the excellence of its know-how and for its roots in Ain (OR ARA) since 1860. This label attests to the high degree of excellence of artisanal and industrial know-how of the family business.

## THE EVP LABEL IN FIGURES:

- **1299 EPV IN FRANCE IN JUNE 2022**  
(83 IN 2006)
- **ALMOST 50% OF EPVS ARE LOCATED IN ILE DE FRANCE (248), AUVERGNE RHONE ALPES (207), NEW AQUITAINE (146)**
- **3 KEY CHARACTERISTICS:**  
SPECIFIC ECONOMIC HERITAGE, RARE KNOW-HOW, FRENCH PRODUCTION IN THE HISTORIC BASIN COMBINING BRAND AWARENESS AND SOCIETAL RESPONSIBILITY
- **A LABEL AWARDED FOR 5 YEARS**  
RENEWABLE UPON EXAMINATION OF THE FILE

Since its creation in 2005, the EPV label has highlighted unique companies that reconcile innovation and tradition, know-how and creation, work and passion, heritage and future, local and international. This state label is attached to the Ministry of Economy and Finance and awarded by the prefects of the region. Its management was entrusted to INMA (Institut National des Métiers d'Art) in 2019. It is the only State label awarded to a company for all its activity, guaranteeing the excellence of its know-how according to demanding eligibility criteria.

The Living Heritage Companies constitute an important part of the artisanal fabric and are proud ambassadors of French historical and future know-how.

Awarded for a period of five years, this label brings together manufacturers who share common values in their activities: the high performance of businesses and products, permanent attention to internal training, a technically and socially innovative approach, and a dynamic commercial strategy. It is a national network of companies of excellence also reconciling adaptability, responsiveness, innovation, and passion for the profession.

Whatever their size, reputation, and specialties, together they watch over a treasure: that of French manufacturing heritage. The EPV label is a real support for «made in France».

The Living Heritage Companies maintain their production activity in France, in sectors with high added value. Most of them are present on international markets and thus export emblematic French know-how. They are representative of the “made in France” spirit and forge the French economic and cultural identity. By calling on the know-how of a labeled company, customers and specifiers support the maintenance and development of these prestigious activities in France, to establish and consolidate long-term and non-relocated jobs. These companies can intervene on non-standard sites, to respond to the most original orders, to offer original and tailor-made solutions to meet the most specialized needs

and the most demanding customers. Perpetuating or reintroducing ancestral and original techniques, they also do not hesitate to innovate and invent new processes or products to meet current needs and standards. Another characteristic of EPVs is to train and encourage vocations to high-level professions. Labeled companies respond precisely to what employees are looking for today: meaning and values while defending the creation of quality and sustainable products, another criterion for EPV eligibility.

Trustees of a heritage, many Living Heritage Companies offer the public to discover their history, their profession, their achievements, by organizing visits to workshops, by opening museums, spaces for the presentation of collections. These visits are a way to share their passion with the public, in the privacy of their workshops.

## Edit a more sustainable design

Concerned about the issues that weigh on our resources, we implement best practices always rooted in our convictions, for a more "sustainable design".

### Tapestry

Tapestry is a French and historical know-how to the company. In addition to manual work, the Roset Group is investing in a new, latest-generation automatic quilting machine for the complex quilting of the Ruche (pictured) in 2022. The range of threads we use for the topstitching of the covers now meets the strict requirements of STANDARD 100 OEKO-TEX®.

### Carpentry

The woods we use come from a variety of sources. Most of our wood is reworked directly in our factories, these are all PEFC certified. The rest of the wood already delivered, processed, is not all certified. We are still working to improve this sourcing. Chipboard or medium panels comply with international formaldehyde emission standards. Our waste is sorted, recycled, and optimized, 100% of wood waste is used to heat our factories.

### Foam Cutter

Polyurethane foams are controlled by CERTIPUR guaranteeing the non-use of heavy metals, or their use at limited thresholds, and no toxic discharge throughout the life cycle. We work for the development of vegetable and biodegradable foams, having a lower environmental impact.

### Textile & Leather Cutting

Kvadrat, Alcantara or even Gabriel; our fabric suppliers are now committed to a CSR approach. In production, we optimize the cuts thanks to specialized software allowing the minimization of production waste. All production scraps are revalued in other industries of the textiles and leather.

We also contribute to the economy internally by recycling our scraps. For example, Alcantara scraps are turned into tote bags for newcomers.

### Bonding

The harmlessness of the products and components chosen to protect the working conditions in the workshop and the living environments of the customers. Since 2003, we have been using 100% water-based glues and hydro lacquers, which are less polluting.

### Assembly

Our wadding is 100% EU origin. In 2020, our main supplier produces a wadding composed of 75% fibers obtained from the recycling of plastic bottles

Our other supplier is Oekotex Standard 100 certified for their wadding, which means that it ensures the production of materials or finished products free of toxic substances.

Prado – Christian Werner

Prado's generous bench seat and back cushions are willfully freeform: one can sit or lie down as they wish.

### Grand Angle – Marie C Dorner

Deep and multiform sofa whose comfort is apparent thanks to its articulated headrests and its «stretch» stitching. Seat in Bultex high resilience polyurethane foam (36kg/m<sup>3</sup> - 2.8 kPa) and hyper-flexible foam (45 kg/m<sup>3</sup> - 1.8 kPa) – Feather facing (goose feathers including 15% feathers).

### Ploum – Ronan & Erwan Bouroullec

Ploum is the fruit of much research into comfort. The result delivers extreme comfort and accommodates different ways of sitting.

### Togo – Michel Ducaroy

Created for afternoon siestas or lazy evenings, Michel Ducaroy's Togo has been the ultimate in comfort and style for decades.

### Ipanéma – Didier Gomez

Curving, enveloping, full of glamour, Ipanema is the new deco seating trend par excellence, inspired by architect Roberto Burle Marx.

### Andy – Pierre Paulin

A Pierre Paulin reissue, Andy consists of four brilliant chrome-plated legs, set in the armrests to impart a sense of lightness.

### Enki – Evangelos Vasileiou

A continuous base and backing structure give Enki the ability to respond to the needs of any space.

### Nils – Didier Gomez

Named after a 1906 novel, Nils is imbued with casual elegance, its simplicity offset by the sophistication of the seam.

### Nomade 2 – Didier Gomez

Nomade 2 is a Parisian collection, in the "Rive Gauche" spirit, in the French "decorative arts" tradition.

### Hémicycle – Philippe Nigro

Conceived with Mobilier National, the Hémicycle collection fits within the highest echelons of power, or the intimacy of private homes.

### Toa – Rémi Bouhaniche

Rémi Bouhaniche draws on origami for Toa's inspiration: the open trapezoid of the seat is paired with a winged backrest.

### Uncover – Marie C Dorner

Cover, divested of its winter coat, becomes Uncover: an ultra-comfortable, all-foam settee—light, compact, easy to move, for year-round cocooning.

### Cover – Marie C Dorner

Apparent sensuality and comfort mask the surprising simplicity of Cover's use: an easily removable cover, making its maintenance a pleasure.

### Anda – Pierre Paulin

The elegance of Anda is apparent in its curves, which envelope the body beautifully.

### Paipaï – LucidiPevere

Inspired by origami and its folds, Paipaï's ultra-flexible foam body is shaped by pleated lines.

### Ruché – Inga Sempé

"Ruché" is derived from a sewing technique, the result of which is a harmony of straight lines and soft curves.

### Moa – Keiji Takeuchi

Advocating simplicity and objects' purposeful roles in one's space, Moa's minimal beauty and honed functionality subscribes to living more with less.

### Archi – Pierre Paulin

A Pierre Paulin reissue, Archi's generous slope and ergonomic seat design support the body perfectly.

### Pukka – Yabu Pushelberg

Yabu Pushelberg designed the Pukka collection to transcend time and space with organic, feminine forms that merge with any space.

### Philéas – Philippe Nigro

Inspired by the banquets of the Orient Express, Philéas offers enveloping comfort, carefully-crafted quilting, achieved using ultra-flexible foam.

### Manarola – Philippe Nigro

Philippe Nigro reinvents the generous comfort offered by Ligne Roset's all-foam seating of the seventies with this collection.

### Pumpkin – Pierre Paulin

A reissue by Pierre Paulin, who designed Pumpkin for former French president Georges Pompidou's private quarters in the Elysée Palace.

### Asmara – Bernard Govin

First produced in 1967, the modular, foam pieces of Asmara are ushered in anew in recognition of our 160th anniversary.

### Bonnie – Pierre Paulin

A Pierre Paulin reissue, Bonnie is made fiercely comfortable by a foam core that rigorously adheres to the body's contours.

### Facett – Ronan & Erwan Bouroullec

This multifaceted collection is ideal for urban living, with small proportions and flexible ottomans.

### Plamy – Annie Hiéronimus

Inspired by the 1980s, Plamy is the epitome of relaxation with cushions that can fold into a chaise lounge position.

### Flax – Philippe Nigro

Comfortable, easy on the eye and compact—Flax is ideal for small spaces, with its walnut frame lightening the interior.

### Mobidec – Pierre Charpin

Footstool borrowing from the equestrian world - a saddle-like seat rests atop a metal base.

### Soufflot – Jean-Philippe Nuel

Designed to reside beneath the soaring Hôtel-Dieu de Lyon's dome, Soufflot ably captures the spaces specific volume in its form.

### Astair – Pierre Charpin

Astair is a contemporary reinterpretation of the wing chair, with technical detailing that offers support to the entire body.

### Ottoman – Noé Duchaufour-Lawrance

This all-foam seating collection combines shape and stylized stitching to provide ideal comfort and unparalleled durability.

### Saparella – Michel Ducaroy

A Michel Ducaroy reissue, Saparella is a modular collection with rounded, airy lines, inviting you to enjoy a beautiful day.

### Amédée – Marie C Dorner

Amédée is designed around a lumbar cushion, quilted and shaped like the bucket seat of a sports car.

### Elysée – Pierre Paulin

A Pierre Paulin reissue, the compact size and visual lightness of this chair makes it ideal for smaller living spaces.

### Nomade Express – Didier Gomez

Nomade Express evokes the understated elegance of the 1930s with its seat and back resembling a traditional mattress.
