A WAY OF LIVING

Boffi is the story of a manufacturing endeavour started in 1934 where the key players remain the artisans, with their manual skills and know-how, who are able to shape premium materials into forms that stand out for their quality and beauty.

It starts off with gestures, manual skills, environments, places, tools and the machines worked by those who come into contact with materials and transform them. This high-level approach to design involves systems operating as homogeneous units to express an architectural vernacular for interiors. By applying a bespoke concept, Boffi offers a vast range of finishes and materials of the highest quality designed to satisfy even the most discerning tastes. The feasibility of a requested finish, colour or essence is immediately evaluated and matched by products recognised for their technical components and quality that are backed by versatile carpentry and production teams. The ability to choose unique materials has always been a prerogative of Boffi in the same way a writer or artist has a preference for a specific word or colour. These are the building blocks that make up the project. It is the source code and the direct link with nature and the interior setting. It represents a concrete approach to interior living, one rooted in a vision of Italian and international design excellence.

Boffi has always committed itself to detailed research, with quality as its number one priority followed closely behind by sustainability and circular materials that, together with durability, represent the key attributes of a manufacturing system that is renowned across the globe as a complete and coherent design offering.

Ninety years of experience linked to the manufacturing of high-end furniture has allowed Boffi to develop a unique entrepreneurial skill set and a preeminent design culture. Today, it is the hub of a carefully selected network of artisans specialising in niche tasks and manufacturing. In fact, there is an exact science required to work the materials that is expressed in the precise gestures of artisans working with their hands. From design to implementation, each Boffi manufacturing phase is undertaken with the utmost care and undergoes a series of checks on the structure and finish to guarantee the final quality of the product. This high level of industrial craftsmanship adheres to principles of sustainable development, guaranteed by international certifications and made possible by rigorous oversight. The aim is to provide a range of solutions, finishes, processes and compositions that serve as an inspiration for clients. A variety of materials and colours offer a subtle charm and unparalleled decorative features help to enhance the quality and preciousness of the unique products created by Boffi thanks to creative and technical production methods. From initial sketch to final product, the client's dream project is attainable, drawing on assistance from the Creative Team that manages to overcome the boundaries of static design to enhance the functions and aesthetics in order to best suit personal tastes.

Impeccable surfaces are derived from materials of the highest quality. Over the years, the exceptional partnerships within the Boffi universe have contributed to achieving high standards of certification.

COMPANY

v

The creative and entrepreneurial leadership of Boffi is able to transmit today the same passion as those who founded the brand. The solid foundation of this project is thanks to its personnel, who are an essential resource for this Made in Italy reality that is indelibly linked to the contemporary history of design.

This story begins inside a small artisan workshop. Each evening, the creative spark was lit as Piero Boffi experimented, researched and executed pieces. The year was 1934 and the first inklings of what would become systems that would go on to be part of the history of furniture design were taking shape. This instinctive passion for shaping new ideas was passed on by Piero to his sons Dino, Pier Ugo and Paolo. In 1947, Piero established the Boffi company, an entrepreneurial culture which would lead to an internationalisation process overseen by the young Paolo Boffi that came to fruition following a fortuitous meeting with future Boffi CEO & President Roberto Gavazzi. The kitchen would become a convivial space, rethought in terms of an architectural language, modularity, functions and colours. The possibilities were, and are, endless. With Paolo Boffi's far-sighted ideas, there came the need for an effective communication strategy and international exposure to distinguish itself from the chaos of the mainstream market. This took place under the creative guidance of Piero Lissoni and the innovative management of Roberto Gavazzi. From the kitchen and bathroom models to the wardrobe systems, it took little time to consolidate the entrepreneurial project as an intuitive, comprehensive offering. Over the course of these ninety years, one has seen generations of creatives, employees, collaborators and inspiring partnerships that are, with every gesture, an attempt to find the same creative spark that was lit in that small workshop in Cesano Maderno. From those fairy-tale beginnings, the dream has become a reality.

Boffi means experimentation and high-end manufacturing that is in constant evolution. It is a vigorous search for beauty and functionality. It looks to create a distinct *way of living*.

Rational bathroom design moves away from a formal, rigid aesthetic by focusing on comfort, space and well-balanced functionality. Design takes on a new meaning in modern spaces that allow fluidity of movement and which are combined with technology, mouldable materials and a range of shapes and dimensions. The focus is on creating a style consistent with the other areas of the home and marked by the quality Boffi is known for.

Bathrooms

WATER INNER

Ultraclean Lines:
B14

BATHROOM

DESIGN: NORBERT WANGEN

YEAR: 2008

ULTRACLEAN LINES

This well-defined system captures the essence of a well-structured, modular design. For the B14, Norbert Wangen proposes the same bevelled edges seen in the countertop for the K14 kitchen. In the bathroom, the 35° edges streamline the composition and create space between the worktop and base unit to grip the doors, which are bevelled on the upper portion. Countertops with a five centimeters thickness are available in composite materials, marble, stone, quartzite and granite.

WATER INNER

Aesthetic Symmetry:
B15

BATHROOM

DESIGN: NORBERT WANGEN

YEAR: 2008

AESTHETIC SIMMETRY

A clear-cut design with countless applications and variations retains its formal lines no matter the configuration. B15 uses the bevelled edges that have become the designer's signature to transform a simple monobloc base unit, with its clean, linear profile, into a sophisticated piece of furniture. The compact, symmetrical form produces a standout design with exacting proportions.

WATER INNER

Design Evolution:
CASE 5.0 BATH

BATHROOM

DESIGN: PIERO LISSONI

YEAR: 2023

DESIGN EVOLUTION

The eye-catching shape of the CASE 5.0 kitchen is now introduced in the bathroom as a wall composition with supporting shelves. It revolves around functionality and design rigour with exclusive materials – monochromatic and tactile clay finishes – and the sharp, attractive lines seen in the front handle.

WATER INNER

The Aesthetic Sign of Functionality:
FLYER

BATHROOM

DESIGN: CRS BOFFI

YEAR: (2013) 2020

THE AESTHETIC SIGN OF FUNCTIONALITY

The name calls to mind an airy lightness. Flyer is available in a linear, wall-mounted version for the bathroom featuring surfaces to support sinks and taps as well as cabinets that include an undercounter drawer with pressure opening. The goal of the Flyer is to avoid having limits placed on modularity and materials.

WATER INNER

WATER INNER

Essential Lines and Monomaterial Appearance:
FREE ZONE

BATHROOM

DESIGN: CRS BOFFI

YEAR: (2017) 2020

ESSENTIAL LINES AND MONOMATERIC APPEARANCE

The Free Zone modular system is the brainchild of the Boffi Research & Development Centre. The wall-mounted units with handle-free fronts provide a visually clean composition. In addition to a selection of lacquers and materials from wood and stone to composite, glass and metal, there is a choice of opening methods for the cabinets featuring hinged doors, pull-out compartments or coplanar sliding doors to satisfy ever individual taste.

WATER INNER

Elements and Atmospheres:
I FIUMI

BATHROOM

DESIGN: CLAUDIO SILVESTRIN

YEAR: (1999) 2024

ELEMENTS AND ATMOSPHERES

The re-edition of I Fiumi, a design by Claudio Silvestrin, is characterised by wall-mounted base units with a reduced height for the bathroom that avoid compromising on space. The clean lines, without joints, remain together with the 45° bevelled edge. The 60-, 90- and 120-centimetre modules can be combined with the reposed Piave countertop washbasin. The new 2024 version introduces the monobloc version with a wooden column and Rubicone sink together with a precious mirror.

WATER INNER

WATER INNER

Poetic Architecture:
I FIUMI ST

BATHROOM

DESIGN: CLAUDIO SILVESTRIN

YEAR: 2011

POETIC ARCHITECTURE

Claudio Silvestrin is known for his precise, architectural aesthetic. The absence of joints and edges is achieved with a folding technique akin to doubling up a delicate sheet of paper. The upper sides of the fronts and side panels have a 45° bevelled edge. Here, continuity is the aim and generates both a visual and functional clarity.

WATER INNER

Pure Minimalism:
L18

BATHROOM

DESIGN: NORBERT WANGEN

YEAR: 2018

PURE MINIMALISM

The minimal rectangular countertop, almost imperceptible in its presence, is made of solid marble with integrated single or double washbasin. The L18 wall-mounted washbasin is created from a single block with rounded corners to highlight its reduced thickness.

WATER INNER

Innovative Thinking:
LAPIS

BATHROOM

DESIGN: PIERO LISSONI

YEAR: (2017) 2021

INNOVATIVE THINKING

Piero Lissoni creates Lapis, an out-of-the-ordinary column washbasin crafted in aluminium, natural stone and brass that imbues the minimalist rectangular column with classic sculptural features. The project is enhanced by the unexpected combination of sophisticated materials. Lapis was conceived as a centrepiece, without an overflow, to make a statement in the bathroom.

WATER INNER

Transforming the Stone:
PH STONE

BATHROOM

DESIGN: PIERO LISSONI

YEAR: 2017

TRANSFORMING THE STONE

This stone washbasin, which can be installed against the wall or placed in the centre of the room, is an elegant column available in marble, stone or granite. Its smooth cylindrical shape brings into focus the veining of the materials that are treated with water and oil repellents to ensure durability.

WATER INNER

Less is More:
PHC

BATHROOM

DESIGN: PIERO LISSONI

YEAR: 2005

PH STONE

LESS IS MORE

Following in the footsteps of the version in stone, the sophisticated PHC model inserts itself into the bathroom in an almost imperceptible way. Depending on one's taste, the model can serve as a centrepiece or against the wall and made in Corian® or Cristalplant®.

WATER INNER

Less is More:
Programma Standard

BATHROOM

DESIGN: PIERO LISSONI + CRS BOFFI

YEAR: 2010

MODULAR ELEGANCE

Programma Standard represents an innovation in the world of bathroom design. This modular system stands out for its extraordinary capacity to adapt, offering a variety of storage units with hinged doors, drawers and flap doors, besides a single pull-out door. Each detail is precisely curated, from the chic Legrabox series of metal drawers, painted matt black, to the practical internal shelves in melamine. Boffi's Programma Standard series is much more than a simple piece of décor: it's a statement of style, a practical piece of art that embodies the fusion of advanced technology and stylish design at the highest level.

WATER INNER

The Essential Cube:
QUADTWO

BATHROOM

DESIGN: JEFFREY BERNETT

YEAR: 2012

THE ESSENTIAL CUBE

Quadtwo is a physical expression of aesthetic minimalism. Ideal for residences and contract commissions where space is at a premium, the compact cube is suspended off the ground and conceals everything inside a tightly packed space. The storage compartments remain hidden inside the monobloc structure in white Cristalplant® – simply follow the lines to find them.

WATER INNER

Simple Geometry:
R.I.G. BATHROOM

BATHROOM

DESIGN: MIKAL HARRSEN

YEAR: 2019

SIMPLE GEOMETRY

Designed by Mikal Harrsen, the R.I.G. system perfectly distils a concept down to its essence. This functional, minimalist design emphasises simple geometry and flexibility. The R.I.G. Bathroom offers one the possibility to create highly customisable wall-mounted or island compositions. The streamlined frame is made up of metal components fashioned into shelving, tops, fronts, panels and countertop washbasins.

WATER INNER

Tactile Shapes:
ROUND SABBIA STONE

BATHROOM

DESIGN: NAOTO FUKASAWA

YEAR: 2021

TACTILE SHAPES

The Sabbia family is further enhanced with new variations that don't take away from the delicacy of the shape. Round Sabbia Stone, available in countertop or pedestal washbasin as well as a bathtub version, share the same rounded shape for the base which further softens the profile and support structure.

WATER INNER

Sculpting Comfort:
SABBIA STONE

BATHROOM

DESIGN: NAOTO FUKASAWA

YEAR: 2008

SCULPTING COMFORT

Through the use of natural materials, Naoto Fukasawa has dreamed up an oval shape with soft, appealing lines to convey a sense of comfort. The sculptural silhouette available in a raised countertop, built-in, wall mounted or freestanding pedestal version and monobloc bathtub, is realised thanks to the intelligent use of Cristalplant® and marble.

WATER INNER

Effortless Design:
SIMPLE

BATHROOM

DESIGN: PIERO LISSONI + CRS BOFFI

YEAR: 2010

SIMPLE

EFFORTLESS DESIGN

The importance of essential lines is seen in the clean, refined shape of Simple with its absence of handles as well as its doors and drawers that offer pressure opening. The modular system includes suspended containers divided into elements of various sizes that can be created in numerous material variations, thus allowing a range of freedom when composing the unit but which always stresses its trademark aesthetic minimalism.

WATER INNER

In Search of Flexibility:
UPPER UNITS

BATHROOM

DESIGN: PIERO LISSONI + CRS BOFFI

YEAR: 2018

IN SEARCH OF FLEXIBILITY

Upper offers the flexibility of a complete bathroom furnishing project in a series of base units, open containers and boiserie with shelves and mirrors. The variety of elements and materials allows you to create customisable projects in order to sync designwise with the rest of the home. The Upper Units suspended bases are characterised by countertop, fronts and panels with sides bevelled at 45° so when closed the piece's thickness is imperceptible.

WATER INNER

WATER INNER

Incisive Inspirations:
WOOD-IN

BATHROOM

DESIGN: PIERO LISSONI

YEAR: 2016

INCISIVE INSPIRATIONS

Piero Lissoni draws inspiration from artisan techniques focused on working the wood with one's hands to craft the perfect joint. This is the aesthetic appeal of Wood-In, with its visible corner joints made exclusively from fine woods. The system integrates countertop washbasins, which can be completed with an optional square base that can be made in different materials such as glass, stone or granite.

WATER INNER

A New Tactility:
ZONE

BATHROOM

DESIGN: PIERO LISSONI

YEAR: 2025

A NEW TACTILITY

Highlighted by a large, almost bathtub-like basin, Zone becomes even more sculptural given its monolithic profile adhering to Boffi proportions. This re-edition of an iconic design for the bathroom from Piero Lissoni is the result of extensive research and innovation. Available in single or double versions, the Zone channel large rectangular washbasin features a minimal and functional aesthetic. Its new stone variant is available in three sizes—1200mm, 1800mm and 2400mm—to meet every design and spatial requirement.

ZONE

From bookshelves to wardrobes, Boffi furniture systems are available in a range of compositions that highlight their modular features. There are endless design possibilities to create sophisticated, one-of-a-kind ambiences made up of details that combine aesthetics finishes and the highest functional quality.

SECTION II

Wardrobes, Shelvings

WATER INNER

Create Your Own Space:
ANTIBES

SYSTEM

DESIGN: PIERO LISSONI

YEAR: 2015

CREATE YOUR OWN SPACE

The wardrobe and walk-in closet are set up to accommodate accessories, safe, hangers, modules, practical compositions, refined finishes and integrated lighting. Designed for both large and compact spaces, Antibes offers maximum flexibility. It features a new decorative glass — MVI by Inalco with embossed graphics on extra-clear transparent glass. The 2025 edition additions extend to the Quadro Mitica door, allowing the Boffi systems the ability to insert an H 2900 mm door into the collection, and offer a full-height aluminium handle.

WATER INNER

WATER INNER

WATER INNER

Inspired by Architecture:
ANTIBES SYSTEM

SYSTEM

DESIGN: PIERO LISSONI + CRS BOFFI

YEAR: 2019

INSPIRED BY ARCHITECTURE

Antibes System redefines the living area by combining aesthetics and functionality, offering versatile and highly customizable solutions. It features sophisticated lighting and an electrification system concealed within the side panels, ensuring a clean and refined design. New additions include 45° corner elements with an aluminium profile and the Quadro door, expanding compositional possibilities. Units can be configured as fully equipped bar modules or storage systems with glass shelves, Boffi finishes, lacquered structures, and stone back panels.

INSPIRED BY ARCHITECTURE

The flexibility of the Antibes living system allows you to create a floor-to-ceiling setup where the structure must be affixed to the ceiling. The wooden framework can be accessorised with a TV stand in various heights, a desk, containers with drawers or flap doors and the option of integrating ADL glass. The LED strip lighting and contrasting lacquered elements create an interplay of colour and movement to underline the elegant, architectural profile.

WATER INNER

WATER INNER

Understated Versatility:
BROMPTON

SYSTEM

DESIGN: PIERO LISSONI

YEAR: 2012

UNDERSTATED VERSATILITY

The common feature shared by Boffi systems is the ability to configure furniture to fit one's needs. The Brompton shelving system with its storage containers does not overlook this fundamental detail. Whether wall mounted or set up as an island, the support structure in matt black anodised aluminium comes with shelves and containers suitable for any space in the home, from the living area to the bedroom and bathroom.

AWARDS

Every award Boffi has won in the fields of design and sustainability is proof of its commitment to rigorous research, experimentation and creative innovation. We are proud and grateful for the achievements earned in these 90 years of business.
